

S8000

Color configuration

Supercharge your ID issuance programs with a true color powerhouse

Mind-blowing performance comes as standard with the first available color configuration from our all-new central issuance platform.

The **S8000** is designed to be the centralized backbone for secure ID card personalization. This configuration of Identis's new platform is stacked with high performance; including a brand new color Drop-on-Demand printing module and Matica's newly patented **Nanotouch card transport** for extended operation and high yield.

Alongside the classic high resolution color portrait, users can print the entire card surface area rapidly in one pass. **Card security** can be enhanced by adding a laser module for features such as MSPI, CLI, MLI, microtext, and transparent element.

By combining color printing with the new Smartcard encoding modules, contactless SmartWall and Contact NewSilos, the S8000 delivers an impressive output of up to **2000cph**.

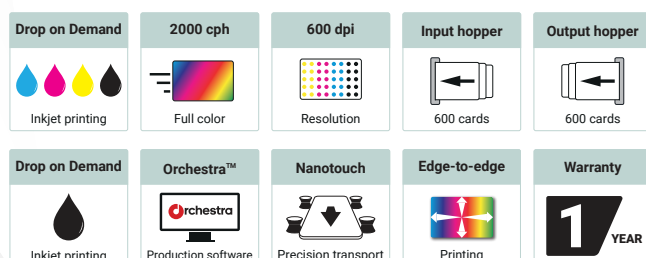

S8000 delivers...

- A brand new platform showcasing Identis's latest technologies and innovations
- High performance color Drop-on-Demand printing module
- SmartWall / NewSilos - Multiple smart card encoding
- Up to 2000 cards per hour
- Nanotouch - for clean and scratch free card transport
- High ratio of performance over footprint
- Integrates seamlessly with Identis's extensive software solutions for card management, smart card encoding, card security and digital identity

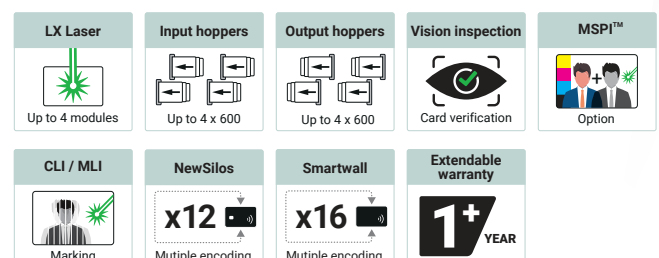

Ideal for...

- National identification cards
- Drivers licenses
- Other government ID

Standard features

Optional features

Specifications

Print technology

- Piezoelectric drop-on-demand (DOD) inkjet head
- Nanotouch card transport system

Laser speed

- Up to 2000 cph

Communications interface

- Ethernet

Module dimensions (L x W x H)

- 48/96 x 70 x 85 cm (Control module)
- 96 x 70 x 140 cm (Color DoD module)
- 48 x 70 x 140 cm (Laser, input, output, NewSilos modules)
- 96 x 70 x 140 cm (Smartwall module)

Power supply

- 100 to 240 VAC; 50/60 Hz, 2500 Watt

Operating time

- 24 / 7

Operating environment

- Temperature: 15°C - 40°C (59°F - 104°F)
- Humidity: 20% - 65% (non-condensing)

Vision verification

- Text (OCR/OCV) and barcode (linear/2D) validation to verify 100% of card production
- Front and/or rear processing available

Safety

- Emergency stop button
- Protected laser marking chamber

Certifications

- CE, UKCA, FCC, UL, RCM, RoHS, Reach, WEEE, Proposition 65

Warranty

- 1 year standard
- +1 year extension available on request

Card specifications

Print area

- ISO standard CR80 cards

Input hopper capacity

- 600 cards (ISO standard, 0.76 mm / 30 mil thickness)
- Up to four multiple hoppers available

Output hopper capacity

- 600 cards (ISO standard, 0.76 mm / 30 mil thickness)
- Up to four multiple hoppers available
- 50 card reject hopper

Card thickness

- 0.76mm +/- 0.08mm

Card types

- Polycarbonate, PVC, PVH/PVCL, ABS, PET, PEC
- Other card types on request

Options

Upgrades and modules

- LX laser marker - up to four modules
- Smartwall contact chip encoding - up to 16 stations
- NewSilos dual interface encoding - up to 12 stations
- Vision inspection
- Multiple input and output hoppers - up to four of each

Software integration solutions

Identis's proven systems can issue a secure credential that converges the physical and digital worlds. The S8000 color platform has been designed to integrate seamlessly with Identis's diverse software solutions.

Identis's comprehensive new **control software** which converts data into secure identity documents, then manages the production flow.

A range of **image security software** designed to add layers of protection to physical identity documents printed on the S8000.

M SUITE from Identis is a standards-based **mobile ID** tech stack that enables the registration, provisioning, sharing and verification of secure digital ID credentials.
